

# An Ounce of Prevention...

## Tailor Made for Goodman Amana PTACs

There are many coil cleaners and maintenance choices on the market. Goodman Amana Brand PTAC Division takes away the guesswork by providing proven solutions for a long-term service life of your equipment.

Got Slime in your PTAC base pan? Our premium time-release pads help to prevent slime build-up and have added corrosion inhibitors designed to minimize coil and pan corrosion. Sta-Clean Condensate Drain Strips can keep your water flowing freely up to 3 to 6-months, allowing the slinger-ring to have the maximum amount of water re-evaporated against the condenser coil and will keep the condenser coil cleaner longer. This means less water over-flow and you will maintain higher effective efficiencies to save your energy dollars.

- Easy-to-Use Aerosol
- No Mixing, No Sprayer, No Mess

## Convenience or Value? Take Your Pick

- Superior cleaning power for Evaporator or Condenser coils without the corrosiveness of acid or expanding-foam alkaline coil cleaners
- Both products are self-rinsing for Evaporator coils
- Clean your coils with Hydro-Balance—don't destroy them with corrosive cleaners!

- Super Concentrate, Super Value!
- 1 Gallon makes up to 9 gallons of useable coil cleaner
